

IKBKE fusion-hotspot benchmark report

Study: msk_impact_50k_2026

Abstract

This report analyzes IKBKE gene fusions from the msk_impact_50k_2026 study, covering 12 fusion events. 3/12 fusions (25.0%) were in-frame. 4/12 fusions (33.3%) retained the Protein kinase domain. Domain retention was tested with Fisher's exact test ($p=0.0242424$, statistically significant at $\alpha=0.05$). No literature benchmark is configured for IKBKE.

Results summary

Fusion partner frequency

Fusion-partner frequency was tabulated across 12 analyzed fusion events, identifying 11 distinct fusion partner genes. The most frequent partner was NAV1, observed in 2 events.

Domain retention

Protein kinase domain retention was tested with Fisher's exact test comparing in-frame fusions against all others; 3/3 (100.0%) of in-frame fusions retained the domain, $p=0.0242424$ (statistically significant at $\alpha=0.05$). A breakpoint-position permutation test produced a corroborating empirical p-value of 0.019802.

Domain disruption

Domain-disruption analysis was skipped: IKBKE has no disruption_required_domains configured; domain-disruption analysis was skipped.

Cutpoint detection

Cutpoint detection scanned 11 mapped breakpoints for the protein position that best separates domain-retained from lost/disrupted fusions; the inferred cutpoint was position 359 aa (permutation-corrected $p=0.39604$, not statistically significant at $\alpha=0.05$). This is 115 aa from the nearest configured domain boundary at 244 aa.

Corroborating confidence statistics

Corroborating confidence statistics were not computed for this run: IKBKE has no group_field configured; confidence-stats analysis was skipped.

Composite evidence score

Composite evidence score reported: domain_disruption sub-score excluded: the supplied result had no applicable p-value (e.g. disruption_required_domains not configured for this gene).

Exon retention

Exon retention reported: No target exon was supplied in params or GeneConfig.

Joint partner

Joint partner reported: IKBKE has no gene_pair configured; joint-partner analysis was skipped.
