KIAA1549 fusion-hotspot benchmark report

Study: msk_impact_50k_2026

Abstract

This report analyzes KIAA1549 gene fusions from the msk_impact_50k_2026 study, covering 44 fusion events. 40/41 fusions with known frame status (97.6%) were in-frame. 22/44 fusions (50.0%) retained the UPF0606 protein KIAA1549 alpha/beta domain 2 domain. Domain retention was tested with Fisher's exact test (p=0.927235, not statistically significant at alpha=0.05). No literature benchmark is configured for KIAA1549.

Results summary

Fusion partner frequency

Fusion-partner frequency was tabulated across 44 analyzed fusion events, identifying 2 distinct fusion partner genes. The most frequent partner was BRAF, observed in 43 events.

Domain retention

UPF0606 protein KIAA1549 alpha/beta domain 2 domain retention was tested with Fisher's exact test comparing in-frame fusions against all others; 19/40 (47.5%) of in-frame fusions retained the domain, p=0.927235 (not statistically significant at alpha=0.05). A breakpoint-position permutation test produced a corroborating empirical p-value of 9.9999e-06.

Domain disruption

Domain-disruption analysis was skipped: KIAA1549 has no disruption_required_domains configured; domain-disruption analysis was skipped.

Junction concentration

54% of 39 fusions with this gene as the 5' partner join at exon 16, against 6% expected if breakpoints fell at random along the gene; this is the most over-represented junction (empirical p=9.9999e-06, corrected for testing every exon, statistically significant at alpha=0.05). The random-breakage null assumes a breakpoint anywhere in the gene would be detected. Capture panels such as MSK-IMPACT tile only selected introns, so concentration on panel data is partly by assay design and this p-value overstates the evidence for biological concentration. Confirm in a cohort sequenced without intron selection (whole genome or RNA).

Cutpoint detection

Cutpoint detection scanned 39 mapped breakpoints for the protein position that best separates domain-retained from lost/disrupted fusions; the inferred cutpoint was position 1687 aa (exon 16; label-permutation p=0.000999001). This boundary is descriptive: retained/lost status follows from breakpoint position, so a clean split exists by construction and the p-value is not evidence of selection. This is -15 aa from the nearest configured domain boundary at 1702 aa.

Corroborating confidence statistics

Corroborating confidence statistics compared Domain_retention_flags groups "retained" (n=21) and "not_retained" (n=18). For Frame_status, retained: 18/19 (94.7%, 95% CI 75.4%-99.1%); not_retained: 17/17 (100.0%, 95% CI 81.6%-100.0%). Welch's t-test comparing Tumor_variant_count between groups gave means of 32.8571 vs 43.6667, p=0.498149 (not statistically significant at alpha=0.05).

Composite evidence score

Composite evidence score reported: domain_disruption sub-score excluded: the supplied result had no applicable p-value (e.g. disruption_required_domains not configured for this gene).

Exon retention

Exon retention produced results for this run (1 row(s) in Exon_retention); see the accompanying table.

Expression association

Expression association reported: No mRNA expression data was available for KIAA1549 in this cohort; expression-association analysis was skipped.

Genomic position recurrence

Genomic position recurrence produced results for this run (17 row(s) in genomic_bin_recurrence, 0 row(s) in exact_position_recurrence, 3 row(s) in protein_position_genomic_spread); see the accompanying table.

Joint partner

Joint partner reported: KIAA1549 has no gene_pair configured; joint-partner analysis was skipped.

Mechanistic interpretation

Mechanistic interpretation produced results for this run; see the accompanying data for details.

Mutation cooccurrence

Mutation cooccurrence reported: KIAA1549 has no mutual_exclusivity_targets configured; co-occurrence/mutual-exclusivity analysis was skipped.

Window detection

Window detection produced results for this run (34 row(s) in window_scan, 12 row(s) in top_windows); see the accompanying table.
